

Rakesh Neopane

FullStack **Developer** (React • Node.js • MongoDB)

Portfolio | LinkedIn | GitHub

 Siliguri, India  +91 8001360426  rakeshneopane@gmail.com

Self-taught full-stack developer who shipped four production-grade applications (Oct 2025–Jun 2026) following two years in Trust & Safety at ByteDance, applying systems thinking to authentication, authorization, and scalable architecture.

PROJECTS

KaviosPix - Photo Management App **Live Demo | GitHub** 04/2026 – 06/2026

- Built a full-stack image management platform with album creation, sharing, comments, favorites, and downloads across 17+ user workflows, implementing Google OAuth2, JWT, Redux, and 19 REST APIs; solved OAuth-redirect auth persistence issues, improving Lighthouse score from 67 → 96.
- Engineered a standalone Python/FastAPI microservice for AI image captioning and semantic search using Google Gemini's generation and embedding APIs with PostgreSQL/pgvector, containerized with Docker and deployed on AWS EC2 behind an API-key-authenticated endpoint.
- Cut the AI service's image size 75% (1.5GB → 350MB) by replacing a locally-loaded ML model with a cloud embedding API, enabling deployment on free-tier infrastructure.

Tech Stack: React, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Cloudinary, Google OAuth2, JWT, Joi, Python, FastAPI, PostgreSQL, pgvector, Docker, AWS EC2, Google Gemini API

WorkAssign - Task Management System **Live Demo | GitHub** 02/2026 – 03/2026

- Built a collaborative task management platform with dashboards, reports, teams, and workload tracking using 20+ frontend modules, 25+ REST APIs, and 5 MongoDB models.
- Solved multi-user permission complexity by centralizing role-based authorization logic and restricting access based on user roles, with Google OAuth2 and JWT-based authentication.

Tech Stack: React, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Google OAuth2

Anvaya CRM **Live Demo | GitHub** 11/2025 – 01/2026

- Built a CRM application for lead management, sales tracking, and pipeline reporting, with lead lifecycle management, search functionality, comments, and follow-up systems using Clerk authentication.
- Designed 14 REST API endpoints and 4 MongoDB models supporting agent, lead, comment, and tag workflows.

Tech Stack: React, JavaScript, Node.js, Express.js, MongoDB, Clerk, Bootstrap

Merze - E-commerce App **Live Demo | GitHub** 10/2025 – 11/2025

- Built an e-commerce application supporting product browsing, cart management, address handling, basic user login, and order placement.
- Improved scalability by refactoring duplicated cart and order logic into reusable frontend and backend modules.

Tech Stack: React, JavaScript, Node.js, Express.js, MongoDB, Bootstrap

TECHNICAL SKILLS

- Frontend:** React, JavaScript, HTML5, CSS3, Redux Toolkit, React Router, Tailwind CSS, Bootstrap, shadcn/ui
- Backend:** Node.js, Express.js, Python, FastAPI
- Database:** MongoDB, PostgreSQL, pgvector
- Auth & Cloud:** JWT, Google OAuth2, HTTP-only Cookies, RBAC, Docker, AWS EC2, Cloudinary, Vercel, Render, Clerk
- Tools:** Git, GitHub, Postman, VS Code, REST APIs

WORK EXPERIENCE

ByteDance (TikTok India) - Trust & Safety Specialist 01/2023- 05/2025 Mumbai, India

- Reviewed and actioned 1,200+ pieces of content daily, maintaining 98% accuracy.
- Escalated critical child safety cases to the Emergency Response Team under platform safety protocols.
- Collaborated with APAC policy teams and onboarded new analysts.

Technocon Services - Power Maintenance Engineer 12/2020 – 02/2021 Siliguri, India

- Managed telecom power systems across a 45 km network, maintaining 100% uptime.

EDUCATION

B.Tech – Electrical Engineering Siliguri Institute of Technology (MAKAUT) | 2016 – 2020

LANGUAGES: English • Hindi • Nepali
